Users	GET /me, PUT /me, GET/POST /addresses
Products	GET /products, GET /products/{id}, GET /categories, GET /collections
Search	GET /search?q=, GET /filters
Wishlist	GET/POST/DELETE /wishlist
Cart	GET /cart, POST /cart/items, PATCH /cart/items/{id}, DELETE /cart/items/{id}
Checkout	POST /checkout, POST /orders
Payments	POST /payments/initiate, POST /payments/webhook, GET /payments/{id}
Orders	GET /orders, GET /orders/{id}, POST /orders/{id}/cancel
Shipping	GET /shipments/{tracking}, POST /shipments/webhook
Reviews	POST /reviews, GET /products/{id}/reviews
Admin	/admin/products, /admin/orders, /admin/customers, /admin/reports

Standards

RESTful JSON APIs under /api/v1. UTF-8 encoding. HTTPS only. ISO-8601 timestamps.

Authentication

Laravel Sanctum bearer tokens for authenticated requests. Role-Based Access Control for protected resources.

Request & Response Format

Use consistent envelopes containing success flag, data payload, message and error details where applicable.

HTTP Status Codes

200 OK, 201 Created, 204 No Content, 400 Bad Request, 401 Unauthorized, 403 Forbidden, 404 Not Found, 409 Conflict, 422 Validation Error, 429 Too Many Requests, 500 Internal Server Error.

Pagination & Filtering

Support page, per_page, sort, order and filter parameters. Return pagination metadata with list responses.

Rate Limiting

Throttle public endpoints and authentication attempts. Apply stricter limits to sensitive operations.

Webhooks

Support payment gateway and courier callbacks with signature verification, idempotency and retry handling.

Security

Validate all inputs, sanitize payloads, use HTTPS, audit privileged operations and never expose sensitive information in responses.

Versioning

Maintain backward compatibility within a major version. Breaking changes require a new API version.

Testing & Documentation

Publish OpenAPI/Swagger documentation and maintain automated integration tests for all public endpoints.
