

Pramo Jewels

Admin Dashboard Specification

Document ID: PJ-ADS-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define the functional, technical and operational requirements of the administrative dashboard.
Audience	Administrators, Product Owners, Backend Developers, Frontend Developers, QA Engineers
Version	1.0

Core Dashboard Modules

Dashboard Module	Capabilities
Executive Overview	Revenue, orders, customers, inventory and KPI widgets
Product Management	Manage products, categories, pricing and media
Order Management	Process, filter and update order statuses
Customer Management	Profiles, support history and loyalty details
Inventory	Stock monitoring, low-stock alerts and adjustments
Marketing	Coupons, campaigns, banners and gift cards
Reports	Sales, logistics, finance and customer analytics
System Administration	Users, roles, settings, audit logs and integrations

Navigation

Responsive sidebar navigation with role-based menus, global search, breadcrumbs, notifications and user profile controls.

Business Rules

Only authorized users access administrative functions. Sensitive operations require appropriate permissions and are recorded in audit logs.

Dashboard Widgets

Provide configurable KPI cards, charts, recent activity, pending approvals, low-stock alerts and operational health indicators.

Administration

Manage products, orders, customers, inventory, shipping, payments, promotions, CMS content and platform configuration from a unified interface.

Security

Enforce RBAC, secure session management, CSRF protection, HTTPS, audit logging and optional MFA support for privileged users.

Performance

Lazy-load dashboards, cache aggregated metrics, paginate large datasets and use asynchronous jobs for heavy reporting.

Integrations

Integrates with Orders, Inventory, Payments, Shipping, Customer Accounts, Analytics, Notifications, CMS and Audit Logging.

Acceptance Criteria

Dashboard loads efficiently, permissions are enforced correctly, operational data is accurate and all administrative actions are traceable.
