Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define functional and technical requirements for customer management within the platform
Audience	Customer Support, CRM Team, Administrators, Developers, QA
Version	1.0

Core Customer Management Modules

Module	Capabilities
Customer Profiles	Personal details, addresses and account status
Order History	Complete purchase timeline and invoices
Wishlist & Loyalty	Wishlist, reward points, tiers and gift cards
Support	Support tickets, returns and complaint history
Communication	Email, SMS and WhatsApp interaction logs
Segmentation	Filter by spending, activity and demographics
Account Actions	Suspend, reactivate, verify and merge accounts
Analytics	Customer lifetime value, retention and purchase trends

Dashboard

Provide customer KPIs including total customers, active users, new registrations, repeat purchase rate and loyalty participation.

Business Rules

Customer records are created automatically upon registration or guest conversion. Personally identifiable information is handled according to privacy policies.

Customer Operations

Search, filter, export, update customer details, manage addresses, review order history, resolve support issues and manage loyalty benefits.

Segmentation & CRM

Create dynamic customer segments for marketing campaigns based on purchase history, engagement, geography and loyalty status.

Security

Enforce RBAC, mask sensitive information where appropriate, log all administrative changes and require approval for sensitive account actions.

Performance

Support server-side pagination, indexed customer search, asynchronous exports and cached dashboard metrics.

Integrations

Integrates with Orders, Payments, Loyalty, Reviews, Notifications, Analytics, Marketing Automation and Audit Logging.

Acceptance Criteria

Customer information is accurate, searches are fast, permissions are enforced correctly and all administrative actions are fully traceable.
