

Pramo Jewels

Sales Analytics Specification

Document ID: PJ-SAN-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define sales analytics dashboards, KPIs, reporting capabilities and decision-sup
Audience	Management, Sales Team, Finance, Product Team, Developers, QA
Version	1.0

Core Sales Analytics Modules

Analytics Module	Capabilities
Revenue Dashboard	Daily, weekly, monthly and yearly revenue
Order Analytics	Orders, AOV, conversion and cancellations
Product Performance	Best sellers, slow movers and category sales
Customer Analytics	New vs returning customers, CLV and retention
Marketing Performance	Coupon usage, campaigns and ROI
Regional Sales	Sales by city, state and PIN code
Forecasting	Trend analysis and demand forecasting
Export & Reports	PDF, Excel, CSV and scheduled reports

Dashboard KPIs

Revenue, gross sales, net sales, average order value (AOV), conversion rate, refund rate, repeat purchase rate, top-selling products and inventory turnover.

Business Rules

Analytics are generated from finalized transactional data. Time zones, currencies and reporting periods are configurable.

Reporting

Support interactive dashboards, scheduled reports, drill-down analysis, comparison reports and custom date ranges.

Forecasting

Use historical sales trends, seasonal patterns and campaign performance to estimate future demand and inventory requirements.

Security

Restrict access using RBAC, mask sensitive financial data where required and audit report generation and exports.

Performance

Use materialized summaries, cached metrics, asynchronous aggregation and indexed queries for high-volume datasets.

Integrations

Integrates with Orders, Payments, Inventory, Marketing, Customer Management, Finance, Notifications and Audit Logging.

Acceptance Criteria

KPIs are accurate, dashboards load efficiently, reports export successfully and analytics remain synchronized with transactional data.
