Version	1.0

Core Reporting Modules

Report Category	Capabilities
Sales Reports	Revenue, orders, taxes, discounts and AOV
Inventory Reports	Stock levels, valuation, aging and movements
Customer Reports	Registrations, retention, loyalty and CLV
Financial Reports	Refunds, settlements and payment reconciliation
Logistics Reports	Shipping, delivery, RTO and SLA performance
Marketing Reports	Campaigns, coupons and conversion metrics
Operational Reports	System usage, audit logs and exceptions
Exports	PDF, Excel, CSV with scheduled delivery

Reporting Features

Support configurable dashboards, drill-down reports, custom filters, comparison reports, scheduled reports and ad-hoc report generation.

Business Rules

Reports are generated from validated transactional data. Reporting periods, currencies and time zones are configurable.

Scheduling

Allow one-time and recurring report generation with email delivery and secure download links.

Security

Restrict report access using RBAC, mask sensitive information where required and audit report generation, viewing and exports.

Performance

Use cached aggregates, asynchronous report generation, pagination and optimized queries for large datasets.

Integrations

Integrates with Orders, Inventory, Payments, Shipping, Customer Management, Marketing, Finance, Analytics and Audit Logging.

Monitoring

Track report generation time, export success rate, scheduled job execution, storage usage and user access patterns.

Acceptance Criteria

Reports are accurate, generated within acceptable response times, exported successfully and accessible only to authorized users.
