

Pramo Jewels

Employee Roles & Permissions Specification

Document ID: PJ-ERP-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define employee roles, responsibilities and permission model for the administration of the platform
Audience	Management, HR, Administrators, Developers, Security Team, QA
Version	1.0

Employee Roles

Role	Primary Permissions
Super Admin	Full platform administration, user management and system configuration
Admin	Manage products, orders, customers, reports and operations
Inventory Manager	Stock updates, warehouse management and procurement
Warehouse Staff	Picking, packing, dispatch and return processing
Customer Support	Customer accounts, returns, refunds and support tickets
Marketing Manager	Campaigns, CMS, coupons, banners and loyalty programs
Finance Manager	Payments, settlements, refunds and financial reports
Logistics Manager	Shipping, courier integrations, tracking and delivery monitoring

Permission Model

Permissions are assigned through Role-Based Access Control (RBAC). Supported actions include View, Create, Update, Delete, Approve, Publish, Export and Configure.

Role Hierarchy

Super Admin has unrestricted access. Functional managers administer their respective modules. Operational staff receive least-privilege access required for daily tasks.

Approval Workflow

Sensitive actions such as refunds, inventory adjustments, user creation, pricing changes and system configuration require approval where configured.

Security

Enforce secure authentication, session timeout, optional MFA for privileged roles, audit logging and periodic permission reviews.

Business Rules

Users may hold one or more roles where approved. Permission conflicts are resolved using the principle of least privilege unless explicitly overridden by policy.

Integrations

Integrates with Authentication, Audit Logging, Admin Dashboard, Orders, Inventory, CMS, Payments, Shipping and Analytics.

Monitoring

Track login history, failed login attempts, permission changes, privileged actions and inactive accounts.

Acceptance Criteria

Employees receive only authorized permissions, approvals function correctly, permission changes are audited and access reviews are supported.
