Status: Draft

Field	Value
Project	Pramo Jewels Brand Identity
Purpose	Define standards for logo creation and usage
Audience	Designers, Developers, Printers, Marketing Team
Version	1.0

1. Logo Vision

Create a timeless luxury identity that reflects craftsmanship, trust and modern elegance. The logo should feel premium without relying on clichés such as crowns or oversized diamonds.

2. Recommended Concept

Use a custom monogram built around the letter 'P' with subtle gemstone-inspired geometry. Pair it with an elegant serif wordmark featuring generous letter spacing.

3. Logo Variants

- Primary horizontal logo
- Stacked logo
- Monogram icon
- Favicon
- Social media profile mark
- Embossing version

4. Color Variations

- Charcoal on light backgrounds
- White on dark backgrounds
- Champagne Gold for premium applications
- Single-color black version for printing

5. Clear Space

Maintain a minimum clear space equal to the height of the letter 'P' around all sides of the logo. No other graphic elements may enter this area.

6. Minimum Size

Print: Minimum width 25 mm.

Digital: Minimum width 120 px.

The monogram may be used at smaller sizes where the full wordmark becomes unreadable.

7. Background Usage

Preferred: Ivory, beige, charcoal and white.

Avoid busy photographic backgrounds unless sufficient contrast is maintained.

8. Incorrect Usage

Do not:

- Stretch or compress the logo.
- Rotate the logo.
- Change approved colors.
- Add shadows, bevels or effects.
- Place on low-contrast backgrounds.
- Recreate the logo manually.

9. Digital Applications

Website header and footer

Mobile app splash screen

Favicon

Email signature

Social media profiles

10. Print Applications

Jewellery boxes

Shopping bags

Business cards

Invoices

Certificates

Product tags

Packaging sleeves

11. File Formats

Master: SVG

Print: PDF / EPS

Web: SVG / PNG

Transparent PNG for marketing assets

12. Future Deliverables

The final logo package should include vector source files, raster exports, monochrome versions, emboss/deboss artwork and usage examples.
