

Pramo Jewels

Photography & Media Style Guide

Document ID: PJ-MEDIA-001

Version: 1.0

Status: Draft

Field	Value
Project	Pramo Jewels Brand Identity
Purpose	Define standards for photography, videography and media assets
Audience	Photographers, Designers, Marketing Team, Developers
Version	1.0

1. Photography Philosophy

Every image should communicate luxury, authenticity and craftsmanship. Jewellery must always remain the focal point while the surrounding composition feels clean, elegant and timeless.

2. Product Photography

- Capture front, side, back and close-up views.
- Show fine craftsmanship and material texture.
- Use high-resolution images with consistent framing.
- Include scale references only where useful.

3. Lighting Standards

- Soft diffused lighting.
- Controlled reflections on metal.
- Natural-looking highlights.
- Avoid harsh shadows and color casts.

4. Background Style

Preferred backgrounds:

- Warm ivory
- Stone beige
- White marble
- Matte charcoal

Avoid distracting patterns and saturated colors.

5. Lifestyle Photography

Use premium interiors and understated styling. Models should wear elegant, timeless clothing that complements the jewellery rather than competing with it.

6. Macro & Detail Shots

Include macro images highlighting gemstone cuts, metal finish, engravings, clasps and craftsmanship details.

7. Video Guidelines

- 4K recording where possible.
- Smooth camera movement.
- Slow product rotations.
- Short-form vertical content for social media.
- Cinematic brand films for campaigns.

8. Social Media Assets

Maintain consistent framing, typography, color palette and logo placement across Instagram, Facebook, Pinterest and future marketing channels.

9. Image Editing

- Preserve natural metal tones.
- Remove dust and imperfections only.
- Do not over-saturate colors.
- Keep editing subtle and realistic.

10. Technical Specifications

Website images: Optimized WebP/JPEG.

Product images: Minimum 2000 px.

Videos: MP4 (H.264/H.265).

Transparent assets: PNG or SVG.

11. AI Media Guidelines

AI-generated visuals should match the Pramo Jewels aesthetic, use realistic materials and lighting, and always be reviewed before publication.

12. Asset Management

- Consistent file naming.
- Organize by collection and SKU.
- Maintain original source files.
- Archive approved campaign assets.

13. Do's & Don'ts

Do:

- Focus on jewellery.
- Use premium compositions.
- Maintain consistency.

Don't:

- Use cluttered scenes.

- Over-edit images.
- Mix inconsistent visual styles.
