

Pramo Jewels

Design Tokens

Document ID: PJ-TOKEN-001
Version: 1.0
Status: Draft

Field	Value
Project	Pramo Jewels Design System
Purpose	Define reusable design tokens for designers and developers
Audience	UI Designers, Frontend Developers, AI Coding Agents
Version	1.0

Core Token Categories

Category	Example Tokens
Colors	--color-bg-primary, --color-accent-gold, --color-text-primary
Typography	--font-heading, --font-body, --font-size-h1, --line-height-body
Spacing	--space-4, --space-8, --space-16, --space-24, --space-32
Radius	--radius-sm, --radius-md, --radius-lg
Shadow	--shadow-sm, --shadow-md, --shadow-lg
Border	--border-width, --border-color
Motion	--duration-fast, --duration-normal, --ease-standard
Z-Index	--z-header, --z-modal, --z-toast
Breakpoints	--bp-sm, --bp-md, --bp-lg, --bp-xl

1. Purpose

Design tokens provide a single source of truth for visual properties, ensuring consistency between design tools and production code.

2. Color Tokens

Primary, surface, text, border, accent and semantic tokens should map directly to the approved brand palette.

3. Typography Tokens

Define font families, font sizes, font weights, line heights and letter spacing using reusable variables.

4. Spacing Tokens

Adopt an 8px spacing scale (4, 8, 12, 16, 24, 32, 40, 48, 64) for layouts and components.

5. Radius & Border Tokens

Use consistent corner radii and border widths across buttons, inputs, cards and dialogs.

6. Elevation Tokens

Standardize shadows for cards, navigation, dropdowns and modals using predefined elevation levels.

7. Motion Tokens

Transition durations, easing curves and animation delays must reference shared motion tokens.

8. Responsive Tokens

Define breakpoint variables and responsive spacing rules for desktop, tablet and mobile.

9. Naming Convention

Use descriptive names such as:

--color-primary-500

--space-16

--font-size-h2

--shadow-md

10. Governance

New tokens must be reviewed before adoption. Deprecated tokens should remain documented until fully removed from design files and code.
