

Pramo Jewels

Iconography Guidelines

Document ID: PJ-ICON-001
Version: 1.0
Status: Draft

Field	Value
Project	Pramo Jewels Design System
Purpose	Define the official icon system for digital and print products
Audience	UI Designers, Frontend Developers, Marketing Team
Version	1.0

1. Icon Philosophy

Icons should be elegant, minimal and immediately recognizable. They support the interface and should never overpower product imagery.

2. Visual Style

- Thin-line outline icons as the default.
- Rounded corners with geometric balance.
- Consistent visual weight.
- Minimal internal detail.

3. Grid & Sizing

- Design on a 24×24 px grid.
- Primary UI size: 24 px.
- Secondary sizes: 16 px, 20 px, 32 px.
- Maintain optical alignment.

4. Stroke Standards

- Consistent stroke width (typically 1.5–2 px).
- Rounded line caps and joins.
- Avoid mixing stroke styles.

5. Categories

Navigation: Home, Menu, Search, Profile.
Commerce: Cart, Wishlist, Checkout, Coupon.
Account: Orders, Address, Notifications.
Logistics: Delivery, Tracking, Returns.
Support: Chat, Phone, Email.
System: Success, Warning, Error, Info.

6. Color Usage

Default icons use the primary text color. Accent colors are reserved for active states, notifications and key actions. Maintain WCAG AA contrast.

7. Interactive States

Default
Hover
Active
Disabled
Focused
Selected

8. Accessibility

- Decorative icons marked appropriately.
- Functional icons include accessible labels.
- Never rely on icons alone to convey critical information.

9. File Formats

Master: SVG.
Web: SVG.
Raster exports: PNG.
Avoid bitmap-only source assets.

10. Naming Convention

Examples:
icon-cart
icon-heart
icon-user
icon-delivery
icon-payment-upi

11. Do's & Don'ts

Do:

- Use approved icons only.
- Keep spacing consistent.
- Align to the design grid.

Don't:

- Stretch or distort icons.
- Mix filled and outlined styles within the same component.
- Use inconsistent stroke widths.

12. Governance

Any new icon must follow these guidelines and be added to the shared design library before implementation.
