

Pramo Jewels

Accessibility Guidelines (WCAG)

Document ID: PJ-A11Y-001

Version: 1.0

Status: Draft

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define accessibility standards aligned with WCAG 2.2 AA
Audience	Designers, Developers, QA Engineers, AI Coding Agents
Version	1.0

1. Accessibility Goal

Deliver an inclusive shopping experience by designing and developing the platform to meet WCAG 2.2 Level AA wherever practical.

2. Core Principles (POUR)

- Perceivable
- Operable
- Understandable
- Robust

3. Visual Accessibility

- Maintain WCAG AA contrast ratios.
- Do not rely on color alone.
- Support browser zoom up to 200%.
- Ensure readable typography and spacing.

4. Keyboard Accessibility

- Full keyboard navigation.
- Visible focus indicators.
- Logical tab order.
- Skip-to-content link.

5. Screen Reader Support

- Semantic HTML.
- Meaningful headings.
- Descriptive alt text.
- Appropriate ARIA roles only when needed.

6. Forms & Validation

- Associate labels with inputs.
- Clear error messages.
- Required fields identified.
- Accessible OTP and checkout flows.

7. Multimedia

- Captions for videos where applicable.
- Controls accessible via keyboard.
- Avoid autoplay with sound.

8. Motion & Animation

- Respect prefers-reduced-motion.
- Avoid flashing content.
- Essential content must not depend on animation.

9. 3D Experience

- Provide image fallback.
- Textual product information outside viewer.
- Keyboard-accessible controls where feasible.

10. Responsive Accessibility

Maintain usability across desktop, tablet and mobile with consistent touch targets and readable layouts.

11. Testing

- Keyboard-only testing.
- Screen reader testing.
- Automated accessibility scans.
- Manual WCAG verification before release.

12. Developer Checklist

Use semantic HTML, maintain heading hierarchy, provide alt text, preserve focus states, validate forms accessibly and test accessibility in CI where possible.

13. Success Criteria

Accessibility compliance is achieved when critical user journeys can be completed by keyboard and assistive technologies without blocking issues, targeting WCAG 2.2 AA.
