1. Business Background

Pramo Jewels is a premium online jewellery brand under Madhav Jewels. The business aims to sell authentic silver and gold jewellery through a modern, secure and immersive e-commerce platform.

2. Business Problem

Existing sales channels do not provide a premium digital experience, centralized inventory, integrated order processing, advanced analytics, or automated shipping and payment workflows.

3. Business Objectives

- Launch a premium luxury jewellery website.
- Sell silver and gold jewellery nationwide.
- Support secure login and customer accounts.
- Offer UPI, cards and Cash on Delivery.
- Integrate logistics partners for shipping and tracking.
- Provide a powerful admin panel for inventory, orders and analytics.

4. Project Scope

In Scope:

- Customer-facing website
- Admin dashboard
- Product catalogue
- Search, filters, wishlist and cart
- Checkout and payments
- Courier integration
- Reviews and customer accounts

Out of Scope (Phase 1):

- Native Android/iOS applications
- Marketplace with multiple vendors
- AR virtual try-on

5. Stakeholders

Business Owner – Pramo Jewels
Management – Madhav Jewels
Customers
Administrators
Delivery Partners
Payment Gateway Provider
Development Team

6. High-Level Functional Requirements

- User registration and authentication
- Product browsing and search
- Shopping cart and wishlist
- Secure checkout
- UPI, card and COD payments
- Shipping partner integration
- Order tracking
- Inventory management
- Customer reviews
- Admin reporting

7. High-Level Non-Functional Requirements

- Responsive design
- Page load under 3 seconds (target)
- Secure data storage
- High availability
- Scalability
- Accessibility
- SEO-friendly architecture

8. Business Risks

- Payment failures
- Inventory mismatch
- Delivery delays
- Cybersecurity threats
- Data privacy compliance

9. Success Criteria

- Successful production launch
- Secure transactions
- Reliable courier integration
- Positive customer experience

- Accurate inventory
- High admin efficiency

10. Assumptions & Dependencies

Availability of payment gateway accounts, shipping partner APIs, product catalogue, branding assets, hosting infrastructure, and legal policies before production deployment.
