| Project      | Pramo Jewels Premium E-Commerce Platform                            |
| Prepared For | Pramo Jewels (by Madhav Jewels)                                     |
| Purpose      | Master software specification for Phase 1                           |
| Audience     | Business, UI/UX, Developers, QA, DevOps, Security, AI Coding Agents |
| Version      | 1.0                                                                 |

### 1. Introduction

This Software Requirements Specification (SRS) defines the complete software requirements for Phase 1 of the Pramo Jewels platform. It serves as the primary technical reference for implementation and testing.

### 2. Project Overview

Pramo Jewels is a premium online jewellery brand offering silver and gold jewellery through a secure, scalable and immersive e-commerce platform with integrated payments, shipping and administration.

### 3. Project Objectives

- Deliver a premium customer experience.
- Build a secure and scalable platform.
- Enable online sales with UPI, cards and Cash on Delivery.
- Integrate courier partners for order fulfillment.
- Provide a comprehensive admin dashboard.

### 4. User Roles

Guest Visitor  
Registered Customer  
Administrator  
Inventory Manager  
Order Manager  
Customer Support  
Super Administrator

### 5. Functional Requirements Summary

User authentication, product catalogue, search, filters, wishlist, cart, checkout, payments, shipping integration, order tracking, profile management, reviews, notifications, inventory management,

analytics and administration.

## 6. Non-Functional Requirements Summary

Performance, security, scalability, availability, accessibility, maintainability, compatibility, SEO, monitoring and compliance requirements as defined in the NFR document.

## 7. External Integrations

- Payment Gateway (UPI, Cards)
- Cash on Delivery workflow
- Shipping Partner APIs
- Email (SMTP)
- SMS / OTP
- WhatsApp notifications
- Cloud storage for media

## 8. Data Requirements

Core entities include Users, Addresses, Products, Categories, Collections, Orders, Order Items, Payments, Inventory, Reviews, Coupons, Wishlists, Notifications and Audit Logs.

## 9. Security Requirements

HTTPS, password hashing, RBAC, CSRF protection, XSS protection, SQL injection prevention, secure cookies, rate limiting, audit logs, encrypted secrets and validated inputs.

## 10. System Architecture

Frontend: Next.js + React + Tailwind CSS + Three.js.

Backend: Laravel.

Database: MySQL.

Storage: Cloud object storage.

CDN and reverse proxy for production deployment.

## 11. Assumptions & Constraints

- Stable internet connectivity.
- Valid payment gateway accounts.
- Courier API availability.
- Product catalogue provided by business.
- Branding assets finalized before UI implementation.

## 12. Acceptance Criteria

- All Phase 1 functional requirements implemented.
- Non-functional targets achieved.
- Payment and logistics integrations operational.
- Security review completed.
- User Acceptance Testing (UAT) approved.

### **13. Future Enhancements**

Native mobile applications, AR virtual try-on, AI recommendations, multilingual support, loyalty program, advanced personalization and omnichannel integrations.
