

Pramo Jewels

Business Rules Document

Document ID: PJ-BRDOC-001

Version: 1.0

Status: Draft

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define business rules governing platform operations
Applies To	Customers, Admins, Operations, Logistics, Payments
Version	1.0

1. Customer Account Rules

- Each customer must register with a unique email address or mobile number.
- Email/OTP verification is required before placing an order.
- Customers are responsible for maintaining accurate profile information.

2. Product Rules

- Every product must have a unique SKU.
- Products must belong to at least one category.
- Products marked 'Out of Stock' cannot be purchased.
- Product prices, purity, weight and specifications must be maintained by authorized administrators.

3. Inventory Rules

- Inventory is reduced only after successful order confirmation.
- Stock updates are restricted to authorized roles.
- Negative inventory is not permitted.

4. Cart & Checkout Rules

- Cart items are associated with the customer's account.
- Delivery availability is determined by serviceable PIN code.
- Shipping charges are calculated according to business policy.

5. Payment Rules

- Supported payment methods: UPI, Debit/Credit Cards and Cash on Delivery.
- COD may be disabled for selected products or locations.
- Orders are confirmed only after successful online payment or valid COD confirmation.
- Failed payments do not create completed orders.

6. Shipping & Delivery Rules

- Orders are assigned to integrated courier partners.
- Tracking IDs are generated after shipment creation.
- Delivery status must be synchronized with courier updates.

7. Return & Refund Rules

- Returns are accepted only within the defined return window.
- Returned items must satisfy quality and eligibility checks.
- Refunds are processed only after return approval.

8. Review Rules

- Only verified purchasers may submit reviews.
- Reviews are subject to moderation before publication.

9. Admin Rules

- All administrative actions require authenticated access.
- Role-Based Access Control (RBAC) governs permissions.
- Critical actions are recorded in audit logs.

10. Security Rules

- Passwords are never stored in plain text.
- Sensitive data is transmitted over HTTPS.
- Input validation is mandatory for all user submissions.

11. Compliance Rules

- Applicable taxes (GST) must be reflected during checkout.
- Privacy Policy and Terms of Service must be accepted where required.

12. Exception Handling

- Invalid orders are rejected with meaningful error messages.
- Payment, shipping and inventory failures are logged for administrator review.
