

Pramo Jewels

Backup & Recovery Plan

Document ID: PJ-BRP-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define backup, restoration and disaster recovery procedures for business continuity
Audience	DevOps Engineers, Database Administrators, Security Team, Operations
Version	1.0

1. Objectives

Protect customer, order and product data while ensuring rapid recovery from accidental deletion, infrastructure failure, cyber incidents and operational errors.

2. Backup Scope

- MySQL databases
- Product media and documents
- Application configuration
- Infrastructure-as-code
- Logs required for recovery
- Encryption keys and secrets (stored securely)

3. Backup Schedule

Database incremental: Every hour
Database full: Daily
Media assets: Daily
Configuration & infrastructure: On every release
Long-term archive: Monthly

4. Retention Policy

Hourly backups: 48 hours
Daily backups: 30 days
Weekly backups: 12 weeks
Monthly backups: 12 months

5. Storage Strategy

Store encrypted backups in geographically separate locations with immutable storage where supported. Verify integrity after each backup.

6. Recovery Procedure

Incident Identification

- Select Recovery Point
- Restore Database
- Restore Media
- Validate Integrity
- Smoke Test Application
- Resume Service

7. Recovery Targets

Target Recovery Time Objective (RTO): 4 hours

Target Recovery Point Objective (RPO): 1 hour

8. Security

Encrypt backups at rest and in transit, restrict access through least privilege, maintain audit logs, and rotate encryption credentials according to policy.

9. Testing

Perform quarterly restore drills, verify backup integrity automatically, document results and remediate gaps promptly.

10. Governance

Every production deployment must confirm a successful backup exists. Recovery procedures, contact lists and escalation paths must remain current and be reviewed at least twice per year.
