

Pramo Jewels

Cart & Checkout Specification

Document ID: PJ-CCS-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define shopping cart, checkout workflow and business rules
Audience	Frontend Developers, Backend Developers, Product Team, QA
Version	1.0

Cart & Checkout Modules

Module	Capabilities
Shopping Cart	Add, update, remove and save items
Wishlist Transfer	Move items between wishlist and cart
Address Management	Select/add delivery addresses
Coupons	Apply and validate promo codes
Shipping Estimation	Delivery charges and ETA
Checkout	Review order and confirm purchase
Payment	UPI, COD and future payment methods
Order Review	Taxes, discounts, totals and invoice preview

Checkout Flow

Product Selection → Cart → Address → Shipping Method → Coupon Validation → Payment (UPI/COD) → Order Review → Order Confirmation.

Business Rules

Reserve inventory during checkout, validate stock before payment, prevent duplicate submissions using idempotency keys and expire inactive carts after a configurable period.

Pricing Engine

Calculate subtotal, discounts, taxes, shipping charges and final payable amount with full price transparency.

Guest & Customer Checkout

Support authenticated checkout by default with optional guest checkout capability if enabled by business policy.

Validation

Verify address, contact details, inventory availability, coupon eligibility and payment readiness before creating an order.

Integrations

Integrates with Product Catalog, Inventory, Payment Gateway, Shipping, Order Management, Notifications and Analytics.

Performance

Persist carts across sessions, optimize API calls, cache cart summaries and use asynchronous processing for non-blocking tasks.

Security

Protect checkout with HTTPS, CSRF protection where applicable, input validation, secure payment redirects and audit logging.

Acceptance Criteria

Customers complete checkout with minimal friction, pricing remains accurate, inventory stays synchronized and successful checkouts generate valid orders.
