

Pramo Jewels

Wishlist Specification

Document ID: PJ-WISHLIST-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define functional and technical requirements for the customer wishlist feature
Audience	Product Team, Frontend Developers, Backend Developers, QA
Version	1.0

Wishlist Modules

Module	Capabilities
Wishlist	Add, remove and organize favourite products
Move to Cart	One-click transfer to shopping cart
Availability	Show stock status and price changes
Sharing	Generate shareable wishlist links (future-ready)
Notifications	Price drop and back-in-stock alerts
Synchronization	Sync across devices after login
Analytics	Track saves and wishlist conversion

User Flow

Browse Product → Add to Wishlist → View Wishlist → Move to Cart or Remove Item → Complete Purchase.

Business Rules

Authenticated users have persistent wishlists. Guest wishlists may be stored temporarily in browser storage and merged after login if enabled.

Validation

Prevent duplicate wishlist entries for the same user. Verify product availability before moving items to the cart.

Notifications

Notify users about price reductions, promotional eligibility and product restocks for opted-in notifications.

Integration

Integrates with Product Catalog, Customer Accounts, Cart, Promotions, Notifications, Analytics and Recommendation Engine.

Performance

Load wishlist using pagination, cache frequently accessed data and optimize queries for large product catalogs.

Security

Require authenticated access for persistent wishlists, validate ownership before modifications and audit administrative actions.

Acceptance Criteria

Wishlist items synchronize across devices, duplicate entries are prevented, move-to-cart works reliably and wishlist analytics are captured.
