Review & Rating Modules

Module	Capabilities
Ratings	1–5 star product ratings
Reviews	Text reviews with optional images
Verified Purchase	Badge for customers who purchased the product
Moderation	Approve, reject or hide inappropriate reviews
Helpfulness	Users can mark reviews as helpful
Reporting	Flag abusive or spam reviews
Analytics	Average ratings and sentiment metrics

User Flow

Delivered Order → Customer Receives Review Invitation → Submit Rating & Review → Moderation (if required) → Published → Displayed on Product Page.

Business Rules

Only verified purchasers may submit reviews by default. One review per purchased product per order unless administrators allow updates.

Validation

Ratings must be between 1 and 5. Review length, image type and upload size are validated server-side.

Moderation

Support automatic spam detection, manual moderation, profanity filtering and the ability to hide or restore reviews while maintaining an audit trail.

Integration

Integrates with Orders, Customer Accounts, Product Catalog, Notifications, Analytics and Recommendation Engine.

Performance

Cache average ratings, paginate review lists and optimize media delivery through the CDN.

Security

Validate ownership, sanitize user-generated content, scan uploaded media and protect against spam and automated abuse.

Acceptance Criteria

Ratings are calculated accurately, verified purchase status is displayed correctly, moderation tools function reliably and review analytics remain consistent.
