

Pramo Jewels

Loyalty & Rewards Specification

Document ID: PJ-LRS-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define the loyalty program, reward points system and customer retention features
Audience	Product Team, Marketing, Developers, QA, Admin Team
Version	1.0

Loyalty Program Modules

Module	Capabilities
Reward Points	Earn points on eligible purchases
Membership Tiers	Silver, Gold, Platinum
Point Redemption	Redeem points during checkout
Referral Rewards	Reward referrer and referred customer
Birthday & Anniversary	Automatic promotional rewards
Reward Wallet	Track points, history and expiry
Campaigns	Limited-time bonus point events
Analytics	Retention, redemption and CLV metrics

Program Flow

Customer Registers → Makes Eligible Purchase → Points Credited → Tier Updated → Rewards Redeemed → Loyalty History Recorded.

Business Rules

Points are awarded only after successful order completion. Cancelled or refunded orders reverse associated points. Redemption limits and minimum balances are configurable.

Tier Management

Tier eligibility is based on cumulative annual spending or configurable criteria. Tier benefits include bonus earning rates, exclusive offers and early campaign access.

Reward Wallet

Display available points, pending points, redeemed points, expiry dates and transaction history.

Integration

Integrates with Customer Accounts, Orders, Cart & Checkout, Coupons, Notifications, Analytics and Marketing Automation.

Fraud Prevention

Prevent duplicate point credits, validate referrals, audit manual adjustments and detect abnormal redemption activity.

Performance

Process point calculations asynchronously where appropriate while ensuring wallet balances remain consistent through transactional updates.

Administration

Admins configure earning rules, tier thresholds, expiry policies, campaigns and manual adjustments. All changes are audit logged.

Acceptance Criteria

Points are calculated accurately, redemptions are validated, tier progression works correctly and loyalty activity is fully traceable.
