Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define functional and technical requirements for digital gift cards and gifting workflow
Audience	Product Team, Marketing, Developers, QA, Customer Support
Version	1.0

Gift Card Modules

Module	Capabilities
Gift Card Purchase	Buy digital gift cards with configurable values
Personalization	Recipient name, message and occasion
Delivery	Instant or scheduled email delivery
Redemption	Apply code during checkout
Balance Management	View remaining balance and transaction history
Expiry	Configurable validity period
Administration	Create, activate, deactivate and monitor gift cards
Analytics	Sales, redemption and outstanding balance reports

Gift Card Flow

Purchase Gift Card → Payment Success → Generate Unique Code → Deliver to Recipient → Redeem at Checkout → Update Remaining Balance.

Business Rules

Gift cards have unique secure codes, configurable denominations, optional expiry, partial redemption support and cannot be redeemed beyond the available balance.

Validation

Validate code authenticity, activation status, expiry, remaining balance and ownership rules where applicable.

Redemption Rules

Gift cards may be combined with supported payment methods. Coupon stacking follows promotion policies defined by administrators.

Security

Generate cryptographically secure codes, encrypt sensitive records, rate-limit redemption attempts and audit every issuance and redemption.

Integration

Integrates with Orders, Payments, Cart & Checkout, Customer Accounts, Notifications, Analytics and Finance modules.

Administration

Admins configure denominations, expiry, branding templates, campaigns and manual adjustments. Every administrative action is audit logged.

Performance

Support high-volume seasonal campaigns with asynchronous email delivery, caching and transactional balance updates.

Acceptance Criteria

Gift cards are issued reliably, balances remain accurate, redemptions are validated securely and all transactions are fully traceable.
