Exchange Workflow

Exchange Request → Eligibility Check → Approval → Pickup/Return Shipment → Product Inspection → Replacement Allocation → Dispatch → Exchange Completed.

Business Rules

Only delivered and eligible orders may be exchanged. Replacement inventory must be available before confirmation. Inventory is updated throughout the exchange process.

Replacement Handling

Allow exchanges for the same SKU variant or another eligible product based on business policy. Handle price differences during checkout or refund.

Customer Communication

Send notifications when the request is received, approved, picked up, inspected, dispatched and completed.

Integrations

Integrates with Orders, Inventory, Shipping, Payments, Notifications, Customer Accounts and Analytics.

Fraud Prevention

Limit repeated exchanges, validate purchase history, require supporting evidence where applicable and audit all manual approvals.

Administration

Admins configure exchange windows, eligible categories, reasons, approval workflows and exception handling. All administrative actions are audit logged.

Acceptance Criteria

Eligible exchanges are processed accurately, inventory stays synchronized, customers can track progress and every exchange is fully auditable.
