

Pramo Jewels

Version History

Document ID: PJ-VH-001
Version: 1.0
Status: Approved

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define standards for version numbering, release history and documenting software
Audience	Developers, Project Managers, QA, DevOps, Product Owners, Stakeholders
Version	1.0

Version History Framework

Version Element	Description
Version Number	Major.Minor.Patch format
Release Date	Official publication date
Change Summary	Features, fixes and improvements
Author	Owner of the release
Reviewer	Technical and business approvers
Approval Status	Draft, Review, Approved, Released
Repository Reference	Tag, commit or branch reference
Release Notes	Links to detailed release documentation

Objectives

Maintain a complete, traceable history of software versions, documentation revisions and release milestones.

Versioning Policy

Adopt Semantic Versioning (Major.Minor.Patch) with documented criteria for each increment.

Release Documentation

Record new features, bug fixes, security updates, known issues and migration requirements for every release.

Approval Process

Require technical review, QA validation and business approval before publishing a new version.

Audit & Traceability

Link every version to source control, issue tracker, change log and release artifacts.

Communication

Distribute release notes and version announcements to all relevant stakeholders.

Integration

Integrates with Version Control, CI/CD Pipeline, Change Log, Release Management, Issue Tracker and Documentation Repository.

Acceptance Criteria

Every released version is uniquely identified, approved, documented, traceable and archived.
