

Pramo Jewels

Test Cases Specification

Document ID: PJ-TCS-001
Version: 1.0
Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define standard test cases for validating functional and non-functional requirements
Audience	QA Engineers, Developers, Product Owners, UAT Team
Version	1.0

Core Test Case Coverage

Test Area	Representative Test Cases
Authentication	Registration, login, logout, password reset, session timeout
Product Catalog	Browse, search, filters, product details
Cart & Checkout	Add/remove items, coupons, checkout validation
Payments	UPI, cards, COD, payment failure, refunds
Orders	Order creation, tracking, cancellation, returns
Admin	Role permissions, product CRUD, reports
Security	Access control, input validation, CSRF/XSS checks
Performance	Page load, API response, concurrent users

Test Case Template

Each test case includes ID, title, prerequisite, test data, execution steps, expected result, actual result, status and remarks.

Functional Testing

Validate customer journeys, product management, orders, inventory, notifications and CMS features.

Non-Functional Testing

Verify performance, scalability, security, usability, accessibility and browser compatibility.

Negative Testing

Cover invalid inputs, authorization failures, network interruptions, payment failures and boundary conditions.

Regression Suite

Maintain reusable automated and manual test cases for all critical business workflows.

Traceability

Map every test case to business requirements and user stories using a requirements traceability matrix (RTM).

Reporting

Record execution status, defect references, screenshots and evidence for failed scenarios.

Acceptance Criteria

Critical workflows pass successfully, expected results match requirements and test evidence is complete.
