

Pramo Jewels

Acceptance Criteria

Document ID: PJ-AC-001
Version: 1.0
Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define measurable acceptance criteria for features, releases and production ready
Audience	Product Owners, QA Engineers, Developers, Business Stakeholders
Version	1.0

Acceptance Areas

Area	Acceptance Criteria
Functional	Business requirements implemented and all critical scenarios pass.
UI/UX	Responsive, accessible and visually consistent across supported devices.
Performance	Response times and load targets meet defined benchmarks.
Security	Authentication, authorization and data protection controls validated.
Data Integrity	Database transactions remain accurate and consistent.
Integrations	Third-party APIs function reliably with successful synchronization.
Regression	Existing functionality remains unaffected after new changes.
Release	Required approvals, documentation and deployment checklist completed.

Definition of Done

Features are complete only when implementation, testing, documentation and stakeholder approval are finished.

Verification Process

Execute functional, integration, regression, security and UAT tests before release approval.

Quality Gates

No unresolved critical defects, high-severity issues accepted only with documented approval, and regression suite passes.

Business Validation

Product Owner confirms business objectives, workflows and user experience meet requirements.

Release Readiness

Deployment checklist, rollback plan, monitoring configuration and operational documentation are complete.

Evidence

Store test reports, screenshots, logs, approvals and traceability records for every accepted release.

Compliance

Ensure privacy, security and accessibility requirements are satisfied before production deployment.

Final Acceptance

Release is approved only after all acceptance criteria are satisfied and stakeholders provide formal sign-off.
