

Pramo Jewels

Analytics & KPI Tracking

Document ID: PJ-AKP-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define analytics architecture, key performance indicators (KPIs), dashboards and reports
Audience	Management, Marketing, Product, Finance, Operations, Developers, QA
Version	1.0

Analytics Domains & KPIs

Analytics Area	KPIs
Sales	Revenue, AOV, conversion rate, refunds
Marketing	Traffic, CTR, ROAS, campaign ROI
Customer	CAC, CLV, retention, repeat purchases
Product	Top sellers, stock turnover, wishlist adds
Operations	Order fulfillment, SLA, RTO rate
Website	Sessions, bounce rate, Core Web Vitals
Support	Resolution time, CSAT, ticket volume
Executive	Business growth, profitability, trends

Data Collection

Capture user interactions, transactions, campaign performance, inventory events and operational metrics using standardized event tracking.

Dashboard Strategy

Provide executive, marketing, sales, operations and customer support dashboards with drill-down capabilities and configurable date ranges.

Business Rules

KPIs are calculated from validated production data. Definitions remain consistent across all dashboards and reports.

Reporting

Support real-time dashboards, scheduled reports, trend analysis, anomaly detection and custom KPI exports.

Performance

Use aggregated datasets, caching, asynchronous processing and optimized queries for responsive dashboards.

Security

Restrict dashboard access with RBAC, protect sensitive business metrics and audit report access and exports.

Integrations

Integrates with Analytics platforms, CMS, Orders, Payments, Inventory, Marketing Automation, CRM and Audit Logging.

Acceptance Criteria

KPIs are accurate, dashboards refresh reliably, reports export successfully and stakeholders can measure business performance consistently.
