

Pramo Jewels

Metadata Standards

Document ID: PJ-MDS-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define standardized metadata requirements for SEO, content discovery and dig
Audience	SEO Team, Content Team, Developers, CMS Administrators, QA
Version	1.0

Metadata Standards

Metadata Element	Standard
Page Title	Unique, descriptive, keyword-focused
Meta Description	Compelling summary with target keywords
URL Slug	Readable, lowercase, hyphen-separated
Canonical URL	Single preferred URL per page
Open Graph	Title, description, image and URL
Twitter Card	Summary card metadata
Schema.org	Product, Organization, Breadcrumb, FAQ and Article markup
Image Metadata	Alt text, captions and descriptive filenames

Naming Conventions

Use consistent naming for products, categories, pages and media. Avoid duplicate titles and ambiguous identifiers.

SEO Rules

Every indexable page must include unique metadata, structured data where applicable and validated canonical references.

CMS Requirements

Metadata fields are mandatory for publishable content with validation before publication.

Quality Assurance

Automatically check missing metadata, duplicate titles, broken canonical links and invalid schema markup.

Performance

Generate metadata dynamically where appropriate and cache rendered metadata for high-traffic pages.

Security

Sanitize metadata inputs, prevent injection attacks and restrict editing permissions using RBAC.

Integrations

Integrates with CMS, Product Catalog, Search, Analytics, Search Console and SEO monitoring tools.

Acceptance Criteria

All published pages contain complete metadata, pass validation checks and support improved search engine indexing and social sharing.
