

Pramo Jewels

Backup & Disaster Recovery Plan

Document ID: PJ-BDR-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define backup, disaster recovery and business continuity procedures
Audience	DevOps, Infrastructure, Security, Database Administrators, Operations
Version	1.0

Backup Schedule

Asset	Backup Frequency	Retention
MySQL Database	Hourly Incremental / Daily Full	30 Days
Media Assets	Daily	90 Days
Configuration & Secrets	On Change	Latest + Monthly Archive
Infrastructure as Code	Every Commit	Repository History
Application Logs	Daily Archive	90 Days
Disaster Recovery Snapshots	Weekly	12 Months

Recovery Objectives

Target Recovery Time Objective (RTO): 4 hours. Target Recovery Point Objective (RPO): 1 hour for production databases.

Disaster Scenarios

Hardware failure, cloud outage, ransomware, accidental deletion, database corruption, application deployment failure and regional service disruption.

Recovery Workflow

Detect incident → Assess impact → Activate DR plan → Restore infrastructure → Restore database → Restore media → Validate integrity → Resume services → Monitor closely.

Recovery Environment

Maintain production-equivalent staging, infrastructure-as-code templates and automated provisioning to accelerate recovery.

Security

Encrypt backups with AES-256, enforce least-privilege access, store copies in geographically separate locations and verify backup integrity.

Testing

Quarterly recovery drills, annual full disaster recovery simulation, backup restoration verification and documented lessons learned.

Roles & Responsibilities

DevOps leads infrastructure recovery, DBA restores databases, Security validates integrity, QA verifies application functionality, Management coordinates communications.

Business Continuity

Prioritize customer authentication, catalogue browsing, checkout, payment verification and order management during phased restoration.

Governance

Review the plan every six months or after significant infrastructure changes, incidents or regulatory updates.
