

Pramo Jewels

Cash on Delivery (COD) Workflow

Document ID: PJ-COD-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define the complete Cash on Delivery workflow, eligibility rules and operational
Audience	Operations, Developers, Logistics Team, Customer Support, QA
Version	1.0

COD Workflow Overview

Workflow Stage	Description
COD Eligibility	Validate PIN code, order value and product eligibility.
Checkout	Customer selects COD and confirms the order.
Order Verification	Optional OTP/call verification for high-risk orders.
Inventory Reservation	Reserve stock until dispatch.
Shipment	Courier collects payment on delivery.
Payment Confirmation	Courier confirms successful collection.
Settlement	Reconcile COD collections with finance records.
Exception Handling	Failed delivery, refusal and RTO processing.

Business Rules

Enable COD only for serviceable PIN codes, eligible product categories and configurable maximum order values. Administrators may apply COD fees or disable COD during campaigns.

Verification

Support risk-based order verification through OTP, phone confirmation or fraud scoring before dispatch.

RTO & Failed Delivery

Handle customer refusal, failed delivery attempts and Return-to-Origin (RTO). Automatically release or restore inventory based on business rules.

Refund & Cancellation

If a COD order is cancelled before dispatch, no payment refund is required. Post-delivery refunds follow the Return & Refund Policy.

Integrations

Integrates with Cart, Checkout, Orders, Inventory, Shipping, Notifications, Accounting, Analytics and Fraud Monitoring.

Security

Validate COD eligibility server-side, audit all status changes and restrict administrative overrides using RBAC.

Monitoring

Track COD success rate, RTO rate, delivery attempts, collection reconciliation, courier settlement delays and fraud indicators.

Acceptance Criteria

Only eligible orders use COD, payment collection is reconciled accurately, inventory remains synchronized and all COD events are audit logged.
