Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define the end-to-end refund lifecycle, business rules and integration requirements
Audience	Finance, Customer Support, Backend Developers, QA, Operations
Version	1.0

Refund Workflow Overview

Workflow Stage	Description
Refund Request	Customer or administrator initiates refund request.
Eligibility Check	Validate return policy, payment status and order state.
Approval	Approve or reject based on business rules.
Gateway Processing	Initiate full or partial refund through payment gateway.
Status Synchronization	Receive webhook and update refund status.
Customer Notification	Notify customer of progress and completion.
Reconciliation	Match gateway settlement with finance records.
Audit Logging	Record every refund action and decision.

Business Rules

Support full and partial refunds. Refunds are processed only for eligible orders and authorized payment transactions. COD refunds follow the configured business policy (bank transfer, UPI or store credit where applicable).

Refund Lifecycle

Requested → Under Review → Approved → Processing → Completed or Failed. Every transition is timestamped and audit logged.

Security

Require RBAC authorization for refund approvals, verify gateway responses, use idempotency keys and protect all payment APIs with HTTPS and secret management.

Failure Handling

Automatically retry transient failures, reconcile pending refunds and escalate unresolved cases for manual review.

Integrations

Integrates with Orders, Returns, Payment Gateway, Customer Accounts, Notifications, Inventory, Accounting and Analytics.

Monitoring

Track refund success rate, processing time, gateway failures, pending refunds, reconciliation mismatches and fraud indicators.

Reporting

Generate refund summaries, financial reconciliation reports, refund reasons, approval history and SLA compliance metrics.

Acceptance Criteria

Eligible refunds are processed accurately, financial records remain synchronized, customers receive timely notifications and every refund is fully traceable.
