

Pramo Jewels

Delivery Workflow

Document ID: PJ-DWF-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define the end-to-end delivery process from shipment dispatch to successful cu
Audience	Operations, Logistics, Backend Developers, QA, Customer Support
Version	1.0

Delivery Lifecycle

Stage	Description
Order Packed	Package prepared and quality checked.
Shipment Dispatched	Courier collects shipment and AWB is activated.
In Transit	Shipment moves through courier network.
Out for Delivery	Courier attempts final delivery.
Delivered	Customer receives package and delivery is confirmed.
Proof of Delivery	POD captured (signature/photo/OTP as supported).
Exception Handling	Manage failed delivery, delays and customer rescheduling.
Completion	Order marked complete and post-delivery workflows begin.

Workflow

Packed → Dispatched → In Transit → Out for Delivery → Delivered → Customer Notification → Order Completed.

Business Rules

Only paid (or approved COD) orders may be dispatched. Delivery status is synchronized from courier webhooks. Failed deliveries follow retry and RTO policies.

Customer Communication

Notify customers at dispatch, out-for-delivery, successful delivery and delivery exceptions via email, SMS or WhatsApp.

Exception Handling

Support delivery rescheduling, incorrect address resolution, customer unavailable scenarios, damaged shipments and Return-to-Origin processing.

Integrations

Integrates with Orders, Shipping Partners, Courier APIs, Notifications, Customer Accounts, Inventory, Analytics and Audit Logging.

Security

Validate courier callbacks, restrict manual status changes through RBAC and maintain immutable delivery audit records.

Monitoring

Track delivery success rate, average delivery time, SLA compliance, first-attempt delivery rate, exception rate and POD availability.

Acceptance Criteria

Delivery statuses remain synchronized, customers receive timely updates, exceptions are handled consistently and all delivery events are fully traceable.
