

Pramo Jewels

Shipping Charge Rules

Document ID: PJ-SCR-001

Version: 1.0

Status: Approved for Development

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define business rules and calculation methods for shipping charges.
Audience	Product Team, Operations, Backend Developers, Finance, QA
Version	1.0

Shipping Charge Categories

Rule Category	Specification
Base Shipping	Configurable base charge by region or courier.
Free Shipping	Eligible above configurable order value or promotions.
Weight-Based	Charges vary by shipment weight slabs.
Zone-Based	Different pricing for local, regional and national delivery zones.
Express Delivery	Optional premium surcharge.
COD Charges	Optional additional fee for eligible COD orders.
Remote Areas	Additional surcharge for non-serviceable or remote locations.
Promotions	Shipping discounts controlled by coupon and campaign rules.

Calculation Workflow

Validate delivery PIN code → Determine shipping zone → Calculate weight/volume → Apply courier rates → Apply promotions/free shipping → Display final shipping charge.

Business Rules

Shipping charges are calculated before payment confirmation. All calculations are server-side. Taxes and surcharges are applied according to configured business policies.

Promotional Rules

Support free shipping campaigns, discounted shipping, loyalty benefits and coupon-based shipping offers with configurable priority.

Courier Selection

Shipping costs may vary by courier. The platform selects the optimal courier based on SLA, cost, serviceability and business rules.

Integrations

Integrates with Cart & Checkout, Courier APIs, Shipping Partner Integration, Orders, Promotions, Analytics and Finance.

Security

Prevent client-side manipulation of shipping charges. Validate all shipping calculations on the server and audit manual overrides.

Monitoring

Track average shipping cost, free shipping utilization, courier cost variance, surcharge usage and shipping revenue recovery.

Acceptance Criteria

Shipping charges are calculated accurately, promotions apply correctly, courier rates remain synchronized and all pricing decisions are auditable.
