

Pramo Jewels

Wireframes

Document ID: PJ-WF-001
Version: 1.0
Status: Draft

Field	Value
Project	Pramo Jewels Premium E-Commerce Platform
Purpose	Define low-fidelity layouts for key screens before visual design
Audience	UX/UI Designers, Frontend Developers, Product Team
Version	1.0

Key Wireframe Specifications

Screen	Primary Layout Elements
Homepage	Header with navigation, hero banner, featured collections, new arrivals, best sellers, trending
Shop / Collection	Breadcrumbs, filters, sort, product grid, pagination, promotional banner.
Product Detail	Image gallery/3D viewer, product details, price, variants, add to cart, wishlist, reviews, related products
Cart	Cart items, quantity controls, coupon, order summary, checkout CTA.
Checkout	Address, shipping, payment (UPI/Card/COD), review, place order.
User Dashboard	Profile, orders, wishlist, addresses, notifications.
Authentication	Login, registration, OTP verification, forgot password.
Order Tracking	Timeline, courier status, invoice, support, return request.
About & Contact	Brand story, contact form, map, FAQs.
Admin Dashboard	KPIs, recent orders, quick actions, alerts.
Admin Product Management	Product list, search, filters, add/edit product, media upload.
Admin Orders	Order queue, shipment status, payment status, fulfillment actions.

Wireframe Principles

Focus on information hierarchy, spacing, navigation and functionality rather than colors or branding. Components should align with the approved design system.

Responsive Considerations

Create layouts for desktop, tablet and mobile. Navigation, product grids and checkout should adapt gracefully across breakpoints.

Annotations

Each wireframe should include notes for interactions, validation rules, loading states and accessibility considerations to support implementation.

Deliverables

Low-fidelity wireframes for all primary customer and admin screens, ready for conversion into high-fidelity UI designs.
